How much does a 1.5kw solar system cost?

Now that we've established the potential savings and benefits of a 1.5kW solar system, let's delve into the cost aspect. The typical price for a 1.5kW solar system is around \$3,000. It's important to note that prices have significantly decreased over the past decade, making solar energy much more accessible and affordable for homeowners.

How many batteries do I need for a 1.5kw solar system?

The number of batteries required for a 1.5kW solar system depends on the battery type. If using the recommended lithium polymer batteries, you would need a capacity of 9 kWh worth of batteries. You have the option to purchase a single battery system or connect several smaller batteries together, depending on your specific needs and preferences.

How much electricity can a 1.5kw solar system produce?

(Load Per Day) The load capacity of a 1.5kW solar system is determined by the amount of sunlight the panels receive. In ideal conditions, where the panels receive at least 5 hours of sunlight per day, a typical 1.5kW solar system can produce 8 kWh of electricity.

How much space does a 1.5kw solar system need?

Considering the physical space required for a 1.5kW solar system, it's important to take into account the size of each panel. Since each panel is approximately 17 sqft, and you will need 5 panels, the total footprint of the system will be 85 sqft.

How much money can a 1.5kw solar system save?

With a 1.5kW solar system, you can save up to \$465 per year. Over the 25-year lifespan of the solar panels, this translates to a savings of \$11,634. These savings are based on the assumption that you will utilize the self-generated solar energy and reduce your reliance on grid electricity.

1.5kVA Solar system with 2x 100AH Batteries, 2x 320W Solar Panels and Installation Installation across Nigeria. Delivery cost will be added depending on the installation location within Nigeria.
