What is Su-Vastika lithium inbuilt battery ESS?

Su-vastika Lithium inbuilt battery ESS offers All-in-One Lithium LifePO4 battery inbuilt power storage system which is not only more powerful but also portable, compact, easy on pocket (cost effective) and environment friendly. The primary component of an ESS is a LiFePO4-based battery.

What is inbuilt lithium Bess?

The Inbuilt lithium BESS has the BMS system to control the parameters of the Lithium battery. As compared to Lead Acid batteries, no water topping is required which creates a security hazard also in today's world. Lithium batteries are made of Lithium LifePO4 cells which are combined and sealed in a battery pack.

How long does a lithium battery last?

Inbuilt Lithium battery Life is a minimum of 10 years and can last for 12 years, and the Lead acid battery lasts only a maximum of 2 years. The life of the lithium battery will be no less than ten years which is very cheap compared to the Lead Acid battery as we need to change the Lead Acid battery within 2 to 3 years of usage.

What is the difference between lithium LiFePO4 and lead acid tubular battery?

The Lithium LifePO4 battery has a C1 rating. In contrast, the Lead Acid Tubular battery comes with a C20 rating, so once the Inverter/UPS is loaded with 80% capacity, then the tubular battery backup reduces as this is meant for C20 capacity, but the Lithium C1 battery capacity remains the same for any percentage of the load.
