As solar technology continues to evolve, a 13.2 kW solar battery system offers a sustainable and cost-effective solution for both residential and commercial properties in Australia. With the potential to reduce electricity bills, provide energy independence, and reduce your carbon footprint, this system is an excellent investment in 2024.

I am researching DIY Grid tie solar with battery backup. I live in Connecticut and have called many companies and the sales reps are basically bricks. They push you to start a solar loan program and will give you an undersized system without backup for 60K!!!. My first question is finding reliable panels (400W?) that have a decent PTC/temp rating.

Just as Tesla quietly upped the Australian price of its Powerwall 2 home battery by \$800, a new residential energy storage offering has appeared on the market offering roughly the same capacity for up to \$5,000 less.. The new offering from Alpha ESS launched in Australia in the first week of November, promising 13.3kWh of storage capacity, a 10-year warranty, and a battery design ...
