

5kw solar system price in with subsidy 2024 Sri Lanka

How do solar panels work in Sri Lanka?

Solar panels convert sunlight into direct current (DC) electricity. The efficiency of these panels can vary, but in Sri Lanka, with its average solar irradiation of around 4.5 to 5.5 sun hours per day, solar panels can generate significant amounts of electricity. High-quality solar panels often use materials like P-type and N-type silicon cells.

How long does a solar installation last in Sri Lanka?

The payback period for industrial solar installations in Sri Lanka typically ranges from 3 to 4 years. Efficient project designs and use of high-quality components contribute to favorable ROI. The upfront costs for a factory-sized solar installation can be significant.

What is a net plus solar PV scheme?

This Scheme is specifically for solar energy. Ideal for: Warehouses or factories that have a large roof space and generate excess power and wants to earn income from the power generated. Net Plus - The solar PV power plant's electricity generation will be exported through a dedicated meter, and the customer will be paid.
