The best is to convert Amp Hours to kilowatt-hours (kWh) and then compare the results. This is done by using the following formula: Kilowatt-hours (kWh) = Amp-hours (Ah) \times Voltage of battery (V) \div 1,000. For example, let us convert 200 Ah at 12 V to kWh. (200 Ah \times 12V) \div 1000 = 2.4 kWh or 2400 watts of energy can be consumed in one hour.
