Where can I find more information about EnerSys?

More information regarding EnerSys can be found at [ABSL](#) is a world leader in the supply of Lithium-ion batteries for space applications with contracts for over 300 spacecraft and launch vehicles. ABSL supplied the first rechargeable Lithium-ion battery flown in space.

Is ABSL a reliable lithium ion?

ABSL has demonstrated in orbit the most reliable Lithium-ion products currently available for the space market by accumulating over 37,000 cell years of space operation without failure. ABSL has been active in the space industry since the 1960's.

Does ABSL have a global customer base?

The Longmont facility services U.S. customers and the United Kingdom facilities service the rest of the world. ABSL has a global customer base and has successfully executed major contracts with major prime manufacturers in North America, Europe and the rest of the world.

EnerSys®; the global leader in stored energy solutions for industrial applications, is excited to announce our partnership with Orogenic ApS, who will now handle all sales and distribution of Motive Power products in Denmark, Iceland, the Faroe Islands and Greenland.

Located along Northern Colorado's Front Range, the ABSL U.S facility is headquartered in Longmont, CO. Since establishing its original US facility in 2008, ABSL soon joined the EnerSys family in 2011 and has since led the U.S. Space industry in providing high quality and high-performance lithium-ion batteries designed specifically for Space.

DataSafe XE batteries provide increased power density for modern critical UPS applications. DataSafe XE batteries are the first specifically designed to meet the evolving needs of today's data center ...

EnerSys was selected by Northrop Grumman in 2012 to provide ABSL(TM) 8s44p rechargeable Li-ion batteries with disconnect relays for Webb, and then awarded a second contract in 2018 for ...

EnerSys (NYSE: ENS), the global leader in stored energy solutions for industrial applications, announced that its recently acquired ABSL Space Products (ABSL) business had ...

The purity of the materials used is key to supporting the CYCLON battery's performance benefits. A longer service life, meaning fewer replacements and the cost associated with it, combined with higher reliability and fewer system failures, result in a lower long term cost of ownership to the end user or equipment owner.

EnerSys Advanced Systems (EAS) has locations in both the US and in Europe that focus primarily on lithium-ion technologies. EAS designs and produces batteries for a wide variety of applications including military, space, medical, and specialized industries and commercial uses. Whether it's a custom primary reserve battery or a configuration requiring high-volume ...
