Who is EnerPro systems?

Enerpro Systems Corp. is a North American market leader in intelligent energy management for new construction and infrastructure upgrades in retrofitted buildings. Since 1996, Enerpro has offered full-service, customizable, energy management solutions.

What is EnerPro energy management?

Since 1996, Enerpro has offered full-service, customizable, energy management solutions. Enerpro's programs maximize efficiencies in energy and water use, reduce consumption and provide numerous economic benefits for a diverse portfolio of building types.

What is EnerPro IEMs?

Enerpro's unique iEMS (Integrated Energy Management System) is the nucleus of the comprehensive suite of services and technologies. iEMS supports the on-demand characteristics and complexities of the continuous cycle of energy and water management, effecting tangible economic, environmental and sustainable results.

How can EnerPro help a building run better?

Enerpro helps create buildings that are carbon neutral, and to retrofit existing buildings to reduce their carbon footprint. Only a systemic, performance proven energy management program delivers sustained reduction in energy consumption, and optimizes the many factors required for financial results. Enerpro's programs make buildings run better.

How does Brendan work at EnerPro?

Brendan works as a liaison between engineering consultants and trades, building owners and Enerpro's operations team. His responsibilities include conceptualizing new and existing systems, defining technology management strategies and identifying potential deficiencies and associated solutions.

What makes EnerPro unique?

Enerpro leads the market with a unique, integrated approach. We recognize technology is a tool, enabled by knowledge, and engaged by people. These three essential elements underpin our customized programs.
