What is Alterna energy?

Alterna Energy is a company focused on the manufacturing of biocarbon from products, such as wood, municipal and agricultural waste and tires. Biocarbon, also called biochar or charcoal, is a renewable replacement for coal manufactured for industrial markets. The material is produced from any biomass through carbonization.

Why should you choose Alterna energy?

ALTERNA ENERGY's team is able to offer competitive pricing while ensuring best in class post-fixtured service. We have a rigorous vendor vetting process so to ensure that only the highest quality fuels are delivered to our partners.

Which energy sources are used in Latvia?

Latvia has underground gas storage facilities at the Inčukalna UGS, with a capacity of 4.47 billion m³. Natural gas companies include Latvijas Gāze. Renewable energy includes wind, solar, biomass and geothermal energy sources. Almost half of the electricity used in the country is provided by renewable energy sources.

What is the main renewable resource in Latvia?

The main renewable resource is hydroelectric power. Latvia has laws that regulate the building of power plants and plans to sell electricity at higher prices. This is a stimulus for investment, especially taking into consideration the fact that Latvia cannot offer big subsidies in order to attract investment.

What is a hydro power station in Latvia?

Hydro is an important power source in Latvia, e.g., the Rēzekne Hydroelectric Power Station is the oldest hydro power station in the country, built in 1940. It was agreed in 2018 that Estonia, Latvia and Lithuania would connect to the European Union's electricity system and desynchronize from the Russian BRELL power system.
