

A computer-driven powerhouse management system runs the efficient operation of the turbine. This system manages both the wind resource and power from the diesel generator. This ensures power supply to the station is always optimised and efficient. Antarctica's fierce conditions presented some challenges for designing and constructing the turbine.

Ms Ellis, a freelance arts consultant, beat thousands of other applicants to gain the opportunity to run the site through the Antarctic summer as a paid job for the UK Antarctic Heritage Trust ...

A 30kW wall-mounted solar power system comprised of 105 solar panels was switched on at Australia's Casey Research Station in Antarctica yesterday. According to Australian Antarctic Division Director Kim Ellis, this is ...

temperature variation in Ellis Fjord Materials and methods During the spring and summer of 1992/93, approximately weekly water samples were collected from three sites in Ellis Fjord, Vestfold Hills, eastern Antarctica (Fig. 1). Sampling commenced on 14 November 1992 and continued until 22 January 1993.

Power Slap: Road To The Title Season 2 officially started November 15 on Rumble and it's bigger and better than ever. Season 1 featured 22 competitors and it ended with four champions emerging from the Power Slap house. Road To The Title helped build the foundation of strikers on the roster and create some star power to launch Power Slap's ...

the power of a long-term monitoring program to detect trends in occupancy for 136 species (83 birds, 33 reptiles, and 20 mammals) across and within Kakadu, Litchfield, and Nitmiluk National Parks ...
