The solution developed by Arone Energy is called Powerhub, a compact, light and sleek cuboid unit that can be charged using solar power, a generator or electricity mains. It is easily portable and when fully charged, can power a standing fan, a 45-watt television and three lightbulbs for 10 hours. The popular unit currently provides affordable ...

Pakistan is importing nearly a third of its energy demand. In the year 2017-2018, its energy imports were around US\$ 14.4 billion as compared to US\$ 10.9 billion in the previous year (SBP, 2018). Almost 75% of the US\$ 3.5 billion increase in energy imports was due to higher energy prices, and only about 25% increase was due to increase in energy import volumes.

Pakistan's energy needs rely heavily on locally produced and imported crude oil. COVID-19 caused a huge decline in local oil demand in 2020 following an economic downturn, but as the economy rebounds there is an uptick in demand for oil as well. With historically high global oil prices, the import bill for Pakistan saw a significant increase ...
