What is the NZ battery project?

A more detailed report may reveal material issues that this report has not identified. The NZ Battery Project was set up in 2020 to explore possible renewable energy storage solutions for when our hydro lakes run low for long periods. A pumped hydro scheme at Lake Onslow was one of the options being explored.

How will a battery storage system benefit New Zealand?

The battery storage will help to reduce these events by smoothing the distribution of supply and demand," Knott said. The system will charge with cheap energy during off-peak hours and send it back to the grid at times of high demand. It will also enable more power generated on New Zealand's South Island to be utilised in the north.
