

Bioferm energy systems Bermuda

What is biofermtm technology?

Committed to sustainable and economical organic waste diversion, the BIOFerm™ technology utilizes anaerobic digestion to harness biogas rising from fermenting organics--food waste, manure, biosolids, etc.--converting it into valuable green energy, heat, fuel, and more.

Does BIOFerm offer a warranty?

BIOFerm is so confident in our technology that we offer the industry's most thorough guarantee and warranty for your system. BIOFerm has a relationship with a preferred financial partner, Isthmus Renewables, if project capital is needed.

What sets BIOFerm apart?

BIOFerm strives to be the industry leading one-stop shop for turnkey facilities that generate value for waste producers and communities throughout North America*. **Collaboration is essential for success, both internally and with our customers. Honesty is a core value, and we conduct business in an open and transparent manner.

Can natural gas be used in BIOFerm?

Natural gas can only be used to best effect once it is freed of hydrogen sulfide, volatile organic compounds, and siloxanes. This is done by passing it through large adsorbers filled with BIOFerm's activated carbon.

BIOFerm is excited to finally share our redesigned website! The refresh features a modern design, improved functionality, and easy access to essential information regarding our technology and products.
