With extreme weather events more common than ever and an aging electrical infrastructure compounding the problem, it's more critical than ever to be prepared with a backup power source. Setting up a solar backup generator is the surest solution for reliable power, especially during an extended outage. 1. Calculate Your Energy Needs

Can I add a generator to my solar system? Standby generators can be used as a backup power source for solar panels. So, if you're looking to combine solar and a standby generator, it is possible. However, you can't have both solar panels and a generator running simultaneously. At all times, they must be electrically isolated.

SolarBW and its affiliate, Widowbird Solar Solutions based in Botswana and South Africa are family-owned companies with over 35 years of experience, specializing in the photovoltaic sector, designing and installing high quality, large scale commercial and residential systems throughout Southern Africa, specifically Botswana and South Africa at an affordable cost.
