

What is the largest battery energy storage system in Bulgaria?

The system is the largest in Bulgaria. Image: Renalfa IPP. A 25MW/55MWh battery energy storage system (BESS) has been commissioned in Bulgaria, Eastern Europe, by operator Renalfa IPP, using technology provided by Chinese firms Hithium and Kehua.

Why do we need energy storage solutions in Bulgaria?

Establish a reliable energy system with greater share of intermittent generation. In the context of Bulgaria's energy landscape, energy storage solutions present a diverse array of benefits to various stakeholders stemming from its unique ability to time-shift energy and rapidly respond when called upon. The applic

Can battery-based energy storage improve peaking capacity in Bulgaria?

Storage can also offer greater flexibility and efficiency in managing the grid. Furthermore, and although hydropower storage already makes up a significant source of peaking capacity in Bulgaria, battery-based energy storage can address peaking needs during times of droughts, meet requirements for more distributed peaking po

Are electricity prices volatile in Bulgaria?

et (where all businesses buy power) in Bulgaria are currently highly volatile. In 2022, Bulgaria saw wholesale electricity prices that were among the

Is a peaking plant a viable alternative for Bulgaria's peaking capacity needs?

Active and fast-responding alternative for Bulgaria's peaking capacity needs. With limited natural gas reserves and uncertain costs for imported energy, storage can provide a reliable source of power during peak demand periods on the Bulgarian grid. Compared to traditional peaking plants

What challenges will Bulgaria face on its energy transition?

and a glimpse of the new challenges Bulgaria will face on its energy transition. In May 2023, Bulgaria was for the first time in a decade a net importer of electricity<sup>2</sup>. The reason for this was not a lack of generating capacity, but instead the natural logic of power markets seeking the

The results indicate that zeolite 13X was the most suitable material for thermal energy storage and suggest its use in the capture and storage of thermal energy that derives from thermal ...

The results indicate that zeolite 13X was the most suitable material for thermal energy storage and suggest its use in the capture and storage of thermal energy that derives from thermal energy waste.

The energy storage density of zeolite could reach 146 kWh/m<sup>3</sup>. The energy storage density increased to 178 kWh/m<sup>3</sup> by applying the charge boost technique [8]. Furthermore, numerical studies have been applied to

investigate the thermal performance of STES reactors. The employed numerical models can be divided into single-phase model and ...

Blvd., Sofia 1000, Bulgaria . E-mail: sboycheva@tu-sofia.bg; dzgureva@gmail ... A novel solar heating system with seasonal and cascade thermal-energy storage based on zeolite water is proposed ...

The system is the largest in Bulgaria. Image: Renalfa IPP. A 25MW/55MWh battery energy storage system (BESS) has been commissioned in Bulgaria, Eastern Europe, by operator Renalfa IPP, using technology provided ...

How can Different Energy Storage Applications Benefit Bulgaria? Energy storage applications play a vital role in the successful integration of renewable energy sources into electricity grid. ...

Design and characterisation of a high powered energy dense zeolite thermal energy storage system for buildings Appl. Energy, 159 ( 2015 ), pp. 80 - 86, 10.1016/j.apenergy.2015.08.109 View PDF View article View in Scopus Google Scholar

5 ???&#0183; Bulgaria is relying heavily on battery technology and energy storage overall for its energy transition. With the surge in photovoltaic capacity, ambitious plans for renewables as a ...

Bulgaria earmarked EUR 589 million for the endeavor, funded under the European Union's Recovery and Resilience Facility. The Ministry of Energy in Sofia plans to launch a tender on September 2 for standalone ...

Key words: hydrogen storage, zeolite, spillover effect, Pd/zeolite composite 1. INTRODUCTION Storing hydrogen molecules in porous media based on a physisorption mechanism is one of ...

The latest white paper, prepared by Fluence in collaboration with APSTE, examines the current state of the Bulgarian energy market and the potential for energy storage applications to ...

5 ???&#0183; The Ministry of Energy of Bulgaria has received 151 project proposals worth nearly BGN 5 billion (\$2.7 billion), more than four times the available funding. ... A total of 151 project proposals were submitted in Bulgaria's ...

We demonstrate a thermal energy storage (TES) composite consisting of high-capacity zeolite particles bound by a hydrophilic polymer. This innovation achieves record energy densities  $>1.6$  kJ g<sup>-1</sup>, facilitated by liquid water retention and polymer hydration. Composites exhibit stability through more than 100 discharge cycles up to 150°C. Post-recharge, liquid ...

Sorption thermal energy storage (STES) systems utilizing zeolite 13X present a promising solution to pressing global energy challenges. In this study, we explore the influence ...

In recent years, several attempts have been made to promote renewable energy in the residential sector to help reducing its CO<sub>2</sub> emissions. Among existing approaches utilizing substances capable of directly storing and transporting thermal energy has recently become a point of interest. Zeolite 13X with exceptional capacity to safely store thermal ...

Shoma Fujii et al. [31] investigated an industrial mobile thermal energy storage system utilizing zeolite water vapor adsorption and desorption cycles. The system incorporated a moving bed indirect heat transfer system as the exothermic system and a moving bed countercurrent contacting system as the charging system. Combining the equations of ...
