

Burundi solar for business program

What does Burundi's solar plant announcement mean for the energy sector?

According to Geoff Sinclair, Managing Director of Camco Clean Energy, which manages REPP: "Once built, the solar plant will add nearly 15% to Burundi's generation capacity using clean energy." (This passage directly answers the question about the impact on the energy sector.)

Does Burundi have solar power?

Burundi has natural conditions favourable to the sustainable use of water and solar energy or wind power. The solar potential of Burundi is very interesting. The average annual power received is around 2000 kWh / m² per year, equivalent to the best European regions (southern Mediterranean).

What is the solar PV project in Burundi?

The solar PV project in Burundi is a 7.5 MW plant located in Mubuga. Interconnection is expected in Q3 2020, which will increase Burundi's installed electricity capacity by 14%.

Do you offer solar systems in rural areas?

In rural areas, we offer solar systems for SME enabled barber shops, bars, shops, etc to have longer opening hours and to increase their revenues. We offer also solar refrigerator, solar water pump, etc. We offer affordable solar home kits for rural families who don't have access to energy.

African Sun Power is a leader for solar products on Burundi and DRC market. We offer a range of solutions designed with Pay-As-You-Go feature. We are also able to design a product based on a specific demand of the enduser.

Supported World Bank Off-Grid Projects Solar Energy in Local Communities (SOLEIL) Off-grid potential Off-grid solar products could play a key role in closing the vast electricity access gap in Burundi - offering a rapidly deployable solution, which would benefit from the dense population concentration (470 inhabitants per square kilometer) and reliable sunshine. So far, however,

(Agence Ecofin) - Au Burundi, la capacité installée est inférieure à 100 MW et le taux d'électrification est de 19 %. Le pays compte donc sur de petites centrales d'énergie renouvelable pour améliorer cette situation. Le tout premier projet d'énergie solaire du Burundi entre en exploitation commerciale.
