

Why are EV batteries being built in Europe?

Europe has been seeking to attract EV battery makers to build factories in the region - home to carmakers such as Volkswagen and Stellantis - as it tries to cut dependency on Asia and win a green subsidies race with the United States. Production plans, however, have faced bureaucratic hurdles, production problems and slower EV demand than expected.

Are China's batteries a problem in Europe?

Chinese companies are even more dominant in battery components, such as cathodes, anodes, separators and electrolytes. And China isn't Europe's only problem: The US, Canada, Japan, South Korea, India and Indonesia are also looking to lure investments to develop their battery industries.
