How much electricity does Cabo Verde use?

Ponta do Sol, Cabo Verde. Image by cinoby/Getty Images Progress has been made already, however, with about one quarter of Cabo Verde's per capita electricity consumption (727kWh per person per year, almost 160% more than the average figure for sub-Saharan Africa) now being provided by renewable resources.

What is the energy sector in Cape Verde?

Cape Verde energy sector is strongly characterized by consumption of fossil fuels (derived oil-primary imported oil), biomass (wood) and use of renewable energy particularly wind and solar power.

Why do Cabo Verdean producers struggle to place their products in hotels?

Local Cabo Verdean producers struggle to place their agricultural and fisheries products in hotels and resorts due to transportation challenges, a lack of packaging and refrigeration, the seasonality of certain products, and difficulty obtaining required certifications.

Does Cape Verde have biomass?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Cape Verde: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

The Cabo Verdean authorities are prioritizing the Blue Economy, the green transition and renewable energy, digitalization and innovation, sustainable tourism and culture, and human capital, including health and education.
