

Can a 'catalytic conversion' impact the African economy?

New consortia, such as Care-O-Sene, Green-Quest or CoalCO₂-X, in which UCT researchers play a leading role, demonstrate the potential of this suite of catalytic conversions to impact the African economy and readying the continent for the expected global trade in renewable energy.

What is the energy capacity of Central Africa?

In 2020, installed electricity capacity in Central Africa stood at 13.81 Gigawatts, with the predominance of hydroelectricity followed by thermal energy. The potential of renewable energy in the sub-region is estimated at 234 for biomass, 874 for concentrated solar-thermal power (CSP), 1989 for solar Photovoltaic (PV) and 771 for wind energy.

Why does Central Africa need an energy mix?

This is a unique capacity which allows Central Africa to achieve an energy mix and also to boost its electrical power for industrialization and social development needs (health, education, household).

What can ECA do for Central Africa?

ECA and partners were also called upon to help build the capacity of sub-regional experts, particularly by tooling them with techniques for designing and negotiating bankable projects. In 2020, installed electricity capacity in Central Africa stood at 13.81 Gigawatts, with the predominance of hydroelectricity followed by thermal energy.

How can Central Africa add value to its exports?

The countries of Central Africa are now aware and committed to turning their backs on the volatile and unsustainable resources rent with a low impact on job creation, poverty reduction and growth intensification. To add value to their exports, it is necessary to strengthen economic structures by diversifying and adding value to exports.

What is the Catalysis Institute?

The Catalysis Institute is, together with its national and international network of partners, ideally placed to develop and realize sustainable technologies within the Power-to-X envelope for the African continent.

Renewable energy: Catalyst for a clean energy transition. Renewable energy: Catalyst for a clean energy transition ... Explore science, technology and innovation. Society. Ageing. Consumer ...

American Airlines (AAL) has teamed up with Bill Gates' Breakthrough Energy Catalyst by contributing \$100m to a collaborative effort to support clean technologies such as sustainable aviation fuel (SAF).. The ...

Energy Technology is an applied energy journal that provides an interdisciplinary forum for researchers and engineers to share important progress in energy research. We publish articles from all perspectives on technical aspects of energy process engineering, covering the generation, conversion, storage, and distribution of energy.

Energy Catalyst Round 10: Late Stage Organisations can apply for a share of up to €10 million in total across the 3 stages, to create new or improved clean energy access in sub-Saharan Africa, South Asia or the Indo-Pacific regions. Competition opens: Monday

Apply Now for GET vest Finance Catalyst Fund Deadline: 17 March 2020 The GET vest Finance Catalyst links renewable energy projects and companies with finance opportunities and vice versa, targeting small- and medium-scale renewable energy (RE) opportunities

Opal Renew(TM) zeolites revolutionize catalytic technologies, leaving a substantial mark on Renewable Fuels production. What Makes Opal Renew(TM) Zeolites Stand Out? Cutting-Edge Technology: Opal Renew(TM) zeolites are purposefully designed for catalytic applications utilizing proprietary IP and know how. These advanced zeolites deliver ...

DUBAI - 1 December 2023 - Today, at COP28, Energy Dome has announced funding commitments for its first CO₂-based and innovative thermo-mechanical energy storage system to be located in Sardinia, Italy. Funding will be in the form of a project-level grant commitment of up to EUR35,000,000 from Breakthrough Energy Catalyst and EUR25,000,000 Venture Debt financing [...]

The technology also simultaneously helps sanitise the waste material used. The MFC technology utilises naturally-abundant microbes in the anode compartment of the cell that work as a bio-catalyst. When the organic waste is fed into the cell the microbes generate electrons by consuming the waste as part of their natural metabolic process.

GET vest launches Finance Catalyst Grant Program Deadline Date: 11-Jan-2022 The GET vest has announced a call for applications for the Finance Catalyst Grant Program to provide advisory support in the areas of investment strategy, business case struct ... you agree to our use of non-essential cookies and other tracking technologies ...

The hydrogen value chain comprises five main stages: 1. Energy source: The energy used to produce hydrogen. Chief sources are natural gas, renewables and nuclear. 2. Production: Methods of making hydrogen, labeled by color. ...

In the ever-evolving spectrum of Africa's energy requirements, gas emerges as a catalyst for a cleaner and more efficient energy alternative. At the forefront of this paradigm shift stands CAPS, positioning itself not merely as a project but as a ...

At M Chemical we care about both the environmental and economic impact of the materials used to support our industry, which is why we have developed a catalyst recycling program. We recycle and repurpose a myriad of metals-based catalysts and adsorbents to improve sustainability and promote a circular economy.

Energy Catalyst (Round 7): early stage Deadline : 18 September 2019 Applications are now open for Energy catalyst round 7: early stage to support highly innovative, market-focused energy solutions in any technology or sector. Innovate UK (part of UK

French firm Global Technologies has been tasked with reviving the Central African Republic's defunct fixed-line provider SOCATEL (Societe Africaine de Telecommunications) by the country's Ministry of Post and Telecommunications (MPT).

Introduction The world today is experiencing a new kind of industrial revolution: the fourth industrial revolution characterised by advancements in technologies in areas such as renewable energy, artificial intelligence (AI), biotechnology, nanotechnology, blockchain, space technologies, virtual and augmented realities, and robotics, among others. These technologies ...

In the Central African Republic, only 700,000 people of its 4.9 million people have access to electricity and about 60 percent of the country's population live in rural areas. Electricity access to the national power grid is limited and unpredictable. This lack of electricity access has made the country vulnerable during the COVID19 pandemic. A [...]
