

Will Vietnam's rooftop solar sector get a major investment boost?

The Vietnam rooftop solar sector is set for a major investment boost with a new draft decree published in early October 2024.

How will Vietnam manage surplus solar power?

It will manage the net-metered surplus solar power. The Vietnamese government has also said that excess PV electricity sold to the grid may not exceed 10% of the power generated by a rooftop PV installation. It has yet to establish a time frame for the introduction of the new tariff and the net-metering scheme.

Does Vietnam have a new PV auction program?

By the end of 2023, Vietnam installed more than 17 GW of PV capacity, mainly through an expired feed-in tariff scheme that supported small-scale and utility-scale installations. However, the government has not launched a new auction program since the previous one expired.

Which DPPA models are adopted under Decree 80/2024?

Decree 80/2024 adopts two models for DPPA, including (1) private wire model (Private DPPA) and (2) national grid connected model (or Grid Connected DPPA). Under Decree 80/2024, the regulatory frameworks governing those DPPA models are as follows: Actual electricity flow
