S-duct intake of a high power turboprop with unconventional integration types requires additional design objectives rather than a basic sizing, considering the propeller-wing ...

The effects of different inlet parameters such as inlet temperature and pressure on combustion performance in a single-head combustor were experimentally investigated in this study. The ...

the inlet air temperature is traditionally believed to cause reduced gas turbine efficiency due to the resulting increase in the compressor power consumption. This study adopts a calculation ...

ect of gas turbine intake air temperature regulating heat exchanger on combined cycle... 10401 1 3 From above, it is noted that the current literature on the intake temperature regulator of gas ...

The effects that compressor and turbine component efficiencies have on thermal efficiency when turbine and compressor inlet temperatures remain constant are shown in Figure 2. In actual operation, the turbine engine exhaust temperature ...

The aim of the simulation is to determine the influence of air-fuel ratio on compressor power, turbine power, generator power, thermal efficiency, turbine inlet temperature and turbine outlet ...

Inlet-air cooling, especially in warm and hot environments, is commonly used to compensate for the efficiency loss caused by high air temperature. Even a small reduction in air temperature ...

Varying inlet conditions showed that in the test conditions range, the test FTHEs are at risk of frosting when the inlet air relative humidity is 95 %, inlet air temperature is 281 K, ...

power and high electricity occur, the inlet air cooling techniques are very useful for reducing the inlet air temperature and thus improving power output and efficiency. It is observed that an ...

This information discusses how very high ambient temperatures impact generator performance, service considerations to ensure reliability, and changes that may have to be made to existing ...

Generator performance at high temperatures. Generally, temperature affects generator engines starting at 40°C. Above this ambient temperature: The air is already very hot and its quality is no longer optimal to ...
