

How does electricity supply work in Djibouti?

Electricity supply services are provided through the vertically integrated utility Electricit  de Djibouti (EDD). A small amount of additional energy is generated by a solar plant (300 kW capacity). Djibouti has wind and geothermal generation potential and is actively studying these options. [citation needed]

What challenges does Djibouti face?

Djibouti's power sector faces several challenges, including issues with overall coherence of planning and goals, infrastructure development, deal flow, and market entry for independent power producers (IPPs).

What is the potential for development in the energy sector in Djibouti?

The potential for development in Djibouti's energy sector remains high. The page below gives an overview of the energy sector in Djibouti.

Does Djibouti have geothermal power?

Djibouti currently has just over 100 MW of installed generation capacity, but only 57 MW is reliably available to serve a population of 940,000 and its key industries. Geothermal resources in Djibouti have been recognized for years, and exploration activities are currently underway to identify economic vapor resources.

What is Djibouti's Vision 2035?

Djibouti's Vision 2035 aims to achieve universal electricity access and power the nation with 100% renewable energy. Already, it sources approximately 65% of its electricity from Ethiopia (mainly hydroelectricity; renewable) via an intertie, reducing its reliance on imported fossil fuels.
