

Do photovoltaic solar panels need to be registered

Do solar panels need Building Regulations approval?

Building regulations approval is mandatory for solar panel installations in the UK. The approval process ensures compliance with safety, structural, and electrical standards. It verifies that the installation is carried out by competent installers and that all relevant regulations are adhered to.

Can a person own a solar PV installation?

While an individual can own the solar PV panels installed at their property, there are instances where the owner of an installation may be different from the owner of the property or site at which the installation is located.

Are solar panels regulated in the UK?

In addition to building regulations approval, solar panel installations in the UK must comply with the Microgeneration Certification Scheme (MCS) standards. MCS is an internationally recognized quality assurance scheme that certifies renewable energy products and installers.

Do I need a building regulations certificate for my solar panel system?

You should receive a building regulations certificate, known as a completion certificate, for your solar panel system. This certificate will assure you and any future owners that the work met all building regulations, which will make it much easier to sell your property at any point.

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system - so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

Are solar panels legal?

Solar panel installations have to pass standard building regulations for the property - it's a legal requirement for many home improvements. The key areas are structural safety of a building (Part A) and electrical safety of a building (Part P).
