

Does Egypt use solar energy?

In 2020, solar energy in Egypt accounted for 1.9% of its total electricity production, making it the second-highest renewable energy source. Egypt is the second country in Africa after South Africa in solar energy utilisation, ranked thirty-first worldwide (IRENA, 2021).

Will EGP 2 trillion be needed in Egypt's energy sector?

The International Finance Corporation (IFC) believes that EGP 2 Trillion are required to be brought into Egypt's energy sector in climate-smart investments by 2030. Egypt is expected to overtake South Africa in the next decade to become the largest electricity market in Africa.

Can Egypt achieve 42% of its energy generation capacity by 2035?

At present, Egypt has set an ambitious objective of achieving 42% of its energy generation capacity from renewable sources by 2035 (known as the 2035 energy target) (IRENA, 2018b). To better exploit the RE potential in Egypt, a few review studies have covered different aspects of RE technologies.

Where is electricity produced in Egypt?

The hydropower energy is concentrated in Upper Egypt, while wind energy is concentrated on Red Sea Coast. Additionally, bioenergy-based electricity is generated in one place with a capacity of 10 MW in Algalab Alasfar. Similarly, a single solar thermal power plant is under operation, which is located in Al-Kuraymat with a capacity of 20 MW.

Is Egypt facing a crisis in its electricity sector?

Speaking before the House of Representatives in February 2021, Egypt's Minister of Electricity and Renewable Energy Mohamed Shaker said Egypt faced a significant crisis in its electricity sector in 2014, but the authorities implemented several projects to improve service.

Does Egypt still rely on conventional energy sources?

According to the rate of increase in the consumption of conventional energy sources in Egypt alongside the CO₂ emissions over the period from 1971 to 2016 (for 47 years as shown in Fig. 1) (The World Bank, 2022), it is evident that Egypt is still relying primarily on the conventional energy resources. Fig. 1.

Egypt Energy is North Africa's biggest energy event with a legacy of 33 years in the region.. The show brings together energy manufacturers and suppliers from all over the world to showcase new technologies and innovative solutions ...
