

# El Salvador bioferm energy systems

What is BIOFerm energy systems?

BIOFerm™ Energy Systems provides anaerobic digestion technology for energy generation and waste management to North American waste operations.

What is biofermtm technology?

Committed to sustainable and economical organic waste diversion, the BIOFerm™ technology utilizes anaerobic digestion to harness biogas rising from fermenting organics--food waste, manure, biosolids, etc.--converting it into valuable green energy, heat, fuel, and more.

What makes BIOFerm unique?

The extensive range of BIOFerm's systems enables seamless integration into existing facilities. Established in Madison, Wis., in 2007, BIOFerm introduced dry fermentation biogas technology to the U.S. renewables industry.

Does BIOFerm offer a warranty?

BIOFerm is so confident in our technology that we offer the industry's most thorough guarantee and warranty for your system. BIOFerm has a relationship with a preferred financial partner, Isthmus Renewables, if project capital is needed.

Can natural gas be used in BIOFerm?

Natural gas can only be used to best effect once it is freed of hydrogen sulfide, volatile organic compounds, and siloxanes. This is done by passing it through large adsorbers filled with BIOFerm's activated carbon.

The company has subsidiaries in Italy and the USA in the form of Schmack Biogas Srl in Bozen and BIOFerm Energy Systems in Madison, Wisconsin. Market leader in gas upgrading. Schmack Carbotech GmbH, Essen was the first company in Germany to develop technologies and processes for upgrading biogas to feed into the natural gas grid. The latest ...

Nadeem Afghan, CEO of BioFerm Energy Systems, is leading an effort to create environmentally friendly systems that convert organic waste into clean energy using the firm's anaerobic digesters. "It could be produced with cow waste, it could be produced with industrial waste," Afghan said, noting BioFerm's processes produce methane, which ...

BIOFerm(TM) Energy System belongs to the Viessmann Group which has an annual international sales volume of 2.8 billion dollars and employs over 11,600 people worldwide. Brand Values Brand values. As long ago as 1966, Viessmann expressed its values in the form of our company principles, which today have been carefully adapted yet still remain the ...

Anaerobic digesters and renewable natural gas (RNG) upgrading are two systems that can not only manage waste streams, but also bring many benefits - financial and environmental - to an operation. As an output, digestate can be ...

BIOFerm's 1-Stage PSA system can typically remove 40-60% of oxygen and nitrogen when air concentrations are up to 4-5% by volume within the raw gas stream and produce biomethane with >960 BTU/scf. However, in the case of higher air concentrations in the raw biogas stream, a second stage PSA unit is required.

As an RNG EPC, BIOFerm is an experienced provider of turnkey renewable energy systems for anaerobic digestion and biogas upgrading. Our range of biogas solutions allows for seamless integration into a variety of different operations, including distilleries, ethanol plants, agricultural operations, landfills, municipalities, wastewater treatment ...
