

What is a powersafe SBS battery?

PowerSafe SBS batteries are manufactured to the highest international standards and are ideal for reliable use in all wireless and fixed-line communication applications. PowerSafe SBS batteries are also widely used in cable TV, emergency lighting, power generation and offshore applications.

What is EnerSys powersafe SBS 40?

Terminal design - leak resistant patented dual seat terminal design The EnerSys PowerSafe SBS 40 batteries provides a superior range of valve-regulated batteries with an extended service life in energy dense configurations.

What is the difference between powersafe sbs30 & sbs40?

The PowerSafe SBS30 is smaller than the competition so the design of the front terminal series offers improved flexibility where space is limited and makes installation and maintenance easier and faster. The PowerSafe SBS40 is designed to cope with raised temperatures and harsh environments.

What is the maximum operating temperature of a powersafe SBS battery?

The maximum operating temperature of the PowerSafe SBS battery series can be extended to 80°C via an optional metal jacket. Features Specialist Power Systems are an approved sales partner to EnerSys in the UK with expert technical knowledge.

Does powersafe SBS accept unlimited current during recharge?

Due to the very low internal resistance, PowerSafe SBS monoblocs and cells will accept unlimited current during recharge but for cost and practical purposes in float applications where recharge time to repeat duty is not critical, the rectifier current can be limited to the load plus 0.1C 10 Amps.

What temperature should a powersafe SBS monobloc be operated at?

However, PowerSafe SBS monoblocs and cells can be operated in the temperature range -40°C to +50°C. In order to maintain mechanical integrity of the plastic components, the battery temperature in operation should not exceed +50°C. Monoblocs and cells lose capacity when standing on open-circuit because of parasitic chemical reactions.
