Located in the tropical region of Central America, San Salvador, El Salvador (13.6806 latitude and -89.1803 longitude) enjoys a considerable amount of sunlight throughout the year, making it an excellent spot for solar photovoltaic (PV) energy generation. The city's distinct wet and dry seasons play a significant role in solar power production.

El Salvador has experienced a remarkable 160-fold increase in solar energy generation capacity from 2015 to 2023, according to data from the Latin American Energy Organization (Olade). This surge is attributed to the growing number of solar farms across the country, which now contribute significantly to the national energy grid.
