What is the long duration energy storage Investment Support Scheme?

Long Duration Electricity Storage investment support scheme will boost investor confidence and unlock billions in funding for vital projects. The UK is a step closer to energy independence as the government launches a new scheme to help build energy storage infrastructure.

How much government funding has been given to energy storage projects?

This was published under the 2022 to 2024 Sunak Conservative government. Over £32 million government funding has been awarded to UK projects developing cutting-edge innovative energy storage technologies that can help increase the resilience of the UK's electricity grid while also maximising value for money.

Can new energy storage technologies boost UK energy resilience?

However, new energy storage technologies can store excess energy to be used at a later point, so the energy can be used rather than wasted - meaning we can rely even more on renewable generation rather than fossil fuels, helping boost the UK's long-term energy resilience.

Which energy storage projects have been sold to Foresight Energy Infrastructure Partners?

In May last year, it sold two battery energy storage system (BESS) projects in southern England to Foresight Energy Infrastructure Partners: Sundon BESS, a 49.5MW project north of London that will connect with National Grid's Energy Park initiative; and Warley BESS, a 57MW project in Essex. Both sites have grid connection dates in 2024.

How can energy storage improve our energy resilience?

Accelerating renewables is key to boosting our energy resilience. Energy storage helps us get the full benefit of these renewables, improving efficiency and helping drive down costs in the long term.

Can energy storage help stabilize energy flow?

Energy storage projects can help stabilize power flow by providing energy at times when renewable energy sources aren't generating electricity--at night, for instance, for solar energy installations with photovoltaic cells, or during calm days when wind turbines don't spin.
