

Eris energy Belize

Where does the energy in Belize come from?

Almost half the energy in Belize comes from hydroelectric power and biomass. BEL purchases 71.5% of its electricity from five domestic independent power producers (IPPs) which produce much of the remaining energy--about 55.6%--of all the electrical needs of the country, and about 40% from a Mexican government-owned electric utility.

How much does electricity cost in Belize?

Belize's utility rates are approximately \$0.22 per kilowatt-hour (kWh), lower than the Caribbean regional average of \$0.33/kWh because of existing renewable energy projects, but still high compared with U.S. mainland rates.

Who owns Belize Electric Company Limited (BECOL)?

Belize Electric Company Limited (BECOL) was owned by Fortis Energy Cayman Inc. (FECI), which acquired 95% of its interest in January 2001. The remaining 5% was owned by the Social Security Board of Belize (SSB) until May 2004, when Fortis Energy Cayman Inc. purchased it. In September 2022, BECOL formally rebranded and became Fortis Belize Limited (FBL).

Why is Belize included in this energy Snapshot series?

Although not an island nation, Belize is included in this energy snapshot series because of the small diesel systems used to power its islands and the fact that it is a member of the Caribbean Community (CARICOM), an alliance of 15 Caribbean nations in the region.

How can Belize achieve a low-carbon community by 2033?

This strategy establishes a framework for transitioning Belize's energy sector and recommends programs and action plans for achieving a low-carbon community by 2033 through improved energy efficiency and conservation measures as well as increased development of the country's renewable energy resources.

What is the National Energy Plan for Belize?

In 2003, a one-year project entitled Formulation for a National Energy Plan for Belize was implemented by the Public Utilities Commission, funded by the United Nations Development Fund. This project developed a comprehensive National Energy Policy to promote environmentally sound, safe, reliable, and affordable energy.

Belize's leading energy subsectors are looking to expand biomass and small-scale solar, as well as create new opportunities in electric vehicles, large-scale solar, liquefied natural gas (LNG), and waste-to-energy. The GOB is pursuing an initiative to convert sargassum seaweed to electricity and is seeking to promote additional similar projects.

Belize currently imports 100% of its fossil fuel use (Launchpad Consulting, 2003). Under the San Jose Pact, which Belize signed onto in 1988, Mexico and Venezuela signed a treaty obligating them to offer a concessionary credit from 20-25% of the purchase price of their oil exports. In 1991, both countries increased the oil supply offered under this agreement (Belize - Mining ...
