About Gresham House and the Gresham House Energy Storage Fund: Gresham House Energy Storage Fund plc seeks to provide investors with an attractive and sustainable dividend over the long term by investing in a diversified portfolio of utility-scale battery energy storage systems (known as BESS) located in Great Britain and internationally.

Why is Gresham House Energy extending its capital structure?

John Leggate, Chair of Gresham House Energy Storage Fund, commented that this extension further optimises the company's capital structure on attractive terms, while Ben Guest, Fund Manager and Managing Director of Gresham House New Energy, added that it allows the company to further deploy into attractive return opportunities.

How can Gresham house new energy reduce build costs?

Ben Guest, lead fund manager and head of Gresham House New Energy, said that increasing economies of scale and streamlined processes mean the company can increase its rate of deployment while reducing build costs. (GBP 1.0 = USD 1.383/EUR 1.165)

Is energy storage a cost-effective solution to energy supply-demand imbalances?

The UK's approach to electricity generation is undergoing fundamental change, shifting from coal and gas-fired power stations towards an energy mix dominated by renewable energy. A cost-effective solution to the intermittency of renewable energy is energy storage to address supply-demand imbalances on the national grid, in real time.

The dynamics of the UK energy market are changing rapidly. Renewable energy's market share in the UK is forecast to double from 40% to 80% by 2050 as the country moves from relying on fossil fuels towards an energy mix dominated by renewable energy and supported by battery energy storage. We believe that energy demand should double in the same period.

Gresham House Energy Storage has overcome the damaging first-quarter slump and expects to post an increase in operating revenues for 2024. In a trading update, the energy trading company said full-year portfolio revenues should exceed last year's £38.7m due to improving market conditions, support for battery storage from the new Labour government and ...
