

What is Eswatini's energy revolution?

Eswatini's energy revolution is a testament to its dedication to sustainability and self-sufficiency. As Eswatini strides into the future with renewable energy, the convergence of local innovation, international collaboration and growth-oriented policies promises to illuminate every corner of the nation.

What is the main energy source in Eswatini?

Hydroelectric power currently stands as one of the most prominent energy sources in Eswatini. The EEC operates four hydropower plants, constituting 15% of the country's electricity production and plans to bolster the existing infrastructure.

Is Eswatini a sustainable country?

A nation that has long relied on neighboring South Africa and Mozambique for unsustainable fossil fuel-based electricity imports, renewable energy in Eswatini is quickly diversifying. The transformative journey culminated at the COP26 conference, where Eswatini committed to an ambitious 50% surge in renewable energy production by 2030.

Are solar panels a viable source of electricity in Eswatini?

Photovoltaic (PV) solar cells are increasingly prominent sources of small-scale electricity production in Eswatini. The government actively encourages the adoption of solar panels in residential and commercial buildings to provide both electricity and water heating.

Why is Eswatini a beacon of inspiration for other developing countries?

As Eswatini strides into the future with renewable energy, the convergence of local innovation, international collaboration and growth-oriented policies promises to illuminate every corner of the nation. This positions Eswatini as a beacon of inspiration for other developing nations navigating toward a self-reliant future.

What does Eswatini's COP26 pledge mean for Swazi energy?

The transformative journey culminated at the COP26 conference, where Eswatini committed to an ambitious 50% surge in renewable energy production by 2030. This pledge signifies a crucial step toward Swazi energy independence, bridging the stark urban-rural economic divide and promising new employment and educational opportunities.
