

What to do in Faro on a solar-powered boat?

Explore the Ria Formosa lagoon around Faro, enjoying nature on a private and beautifully quiet boat trip on a solar powered boat, while practising responsible tourism. Ria Formosa is one of the most beautiful areas in the Algarve and our solar-powered boats are perfect for exploring it.

What is a Ria Formosa eco boat tour?

The schedules of departures and arrivals, the duration, and itineraries of the activities are subject to change without previous notice due to security determined by the weather conditions, tides, and/or other circumstances beyond our control. This Ria Formosa eco boat tour is a small-group solar boat ride around Faro.

What is the energy potential of the Faroe Islands?

Faroe Islands exhibit high wind and hydro potential. Electricity, heating and onshore transportation needs are considered in this work. RES annual penetration higher than 90% can be achieved. Wind parks, p/vs and pumped storage systems are the most feasible technologies. RES penetration above 95% requires smart grid integration concepts.

Can Faroe Island achieve 100% energy independence?

The achievement of the 100% energy independence in the remote insular systems of the Faroe Islands is proved to be a real challenge. The topos of Faroe Island is truly blessed with abundant wind and hydrodynamic potential and excellent sites for PHS installations, integrated in a breath-taking, majestic landscape.

Why should you choose Faroe Island?

The topos of Faroe Island is truly blessed with abundant wind and hydrodynamic potential and excellent sites for PHS installations, integrated in a breath-taking, majestic landscape. The low wind potential availability during summer constitutes the main obstacle to be faced, for a clear, 100% exclusive energy production in Faroe from RES.

Which technology is most feasible in the Faroe Islands?

Wind parks, p/vs and pumped storage systems are the most feasible technologies. RES penetration above 95% requires smart grid integration concepts. The Faroe Islands complex consists of 18 islands.
