

Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is EUR540 per household per year.

Does France have a solar market?

The French PV market is the fourth largest in Europe with 1GW installed each year. France has an objective to have a total of 20.6 GWp of solar installed by 2023, consistent with EU energy policies.

Which energy company has the biggest solar portfolio in France?

ENGIE is a gas utility also present in the development and generation of electricity capacity - and has the biggest solar portfolio in France at around 1 GW (3 GW worldwide). Almost all local authorities have climate energy plans that are generally ambitious in terms of photovoltaic development.

Why is France launching a 'solar registry'?

In addition, the Act established a 'solar registry' to help identify 'acceleration zones', listing the development potential of available roofs and car parks that could have solar panels added to them by local authorities. France is currently on course to miss its target to commission 20.1GW of solar power by late 2023.

What is the France solar industry initiative?

The France solar industry initiative is designed to showcase French know how across all solar technologies, and members are present from upstream (research and machine tools) all the way through the value chain from industry to support, installation and O&M.

How can French government encourage the development of photovoltaic systems?

Competitive tenders are the chosen tool for the French government to encourage the development of photovoltaic systems, although projects are increasingly developed outside of the framework in PPA's considering the ballooning market cost of electricity.

PV Tech has been running PV ModuleTech Conferences since 2017. PV ModuleTech USA, on 17-18 June 2025, will be our fourth PV ModuleTech conference dedicated to the U.S. utility scale solar sector.
