

Futurex energy Jordan

Is Jordan a good place to invest in energy?

Jordan, with a population of less than seven million and almost no conventional hydrocarbon resources, has emerged as a relatively stable market for energy investment as the small nation attempts to diversify its energy mix, increase energy independence, and meet growing demand.

How much solar power will Jordan have by 2020?

Jordan's target to cover 10 percent of energy demand with renewable generation by 2020 is well underway. By 2020, at least 612 MW of solar capacity will have been installed. (212 MW in 2014 + 400 MW assigned through auctions in 2015)

Can oil shale help save Jordan's economy?

Oil shale is expected to contribute to 14 percent of Jordan's fuel mix by 2020, which could potentially help the country save approximately two percentage points of its total GDP through the replacement of imported oil products with indigenous oil shale.

Should Jordan accept Israeli gas?

From a commercial standpoint, Jordan's acceptance of Israeli gas would likely reduce rates for electricity consumers, encouraging economic growth. However, Jordan's new LNG facility should also prove a strategic asset, as it will allow Jordan to import gas from the international market if regional deals unravel.

For over 40 years, Futurex has been the industry leader in enterprise data protection solutions. All Futurex products are securely built and signed in the USA. Skip to content. CryptoHub is 2024 Data Protection Solution of the Year! Learn More

One is the growing energy demand and the other is the scarcity of domestic resources available to meet such demand. With limited resources, Jordan is in the position of importing 7,656 ktoe of energy in order to fulfill the energy requirements. So, the cost of the consumed energy here falls to as much as 17% of the GDP. Energy situation in Jordan
