Maurel and Prom SA's \$730 million acquisition of Gabon-focused Assala Energy, owned by private equity fund Carlyle Group, was intended to strengthen the company's position in the country. Due to close between the fourth quarter 2023 and the first quarter of 2024, it is now likely to be delayed due to a military coup which occurred in Gabon on 30 August 2023.

London, UK - Carlyle-backed Assala Energy today announced the acquisition of Shell's onshore assets in Gabon, Africa, for \$587 million. Assala Energy will also assume associated liabilities, including a loan of \$285 million. Assala Energy is a portfolio company owned by global alternative asset manager The Carlyle Group (CG: NASDAQ).

The High-Level Dialogue on Energy, on 24 September 2021, is the first global gathering on energy since the UN Conference on New and Renewable Sources of Energy in 1981. It aims to catalyse innovative solutions, investments and partnerships in support of the Sustainable Development Goals and Paris Agreement on Climate Change.

renewable energy in the global energy mix 7.2.1 Renewable energy share in the total final energy consumption 78.3 74.5 63.0 69.57 7.3 By 2030, Double the rate of improvement of energy efficiency 7.3.1 GDP per unit of energy use (constant 2011 PPP \$ per kg of oil equivalent) - - 12.5 13.2 (2011) Level of primary energy intensity(MJ/\$2005 PPP)

These licence awards further underpin BW Energy's commitment to Gabon and clear ambition of growing production and cash flow generation," said Carl K. Arnet, the CEO of BW Energy. VAALCO Energy (37.5%) and Panoro Energy (25%) are non-operating joint venture partners in the PSCs, which have an eight-year exploration period with option to ...

Energy in Gabon comes from two main sources, fossil-fuels and hydroelectricity. Gabon also relies heavily on oil for its export revenues, exporting both crude oil and petroleum. In terms its oil reserves, the country is one of the richest in sub-Saharan Africa, ranking 5th after Nigeria, Angola, Sudan, South Sudan, and Uganda. Renewable energy in the form of solar power is virtually nonexistent.
