Why is the energy sector a problem for Ghana?

Long delays in payments by the government are a significant concern in Ghana's energy sector, as the subsidy comes from the national budget. Debt within the energy sector and the high cost of power in Ghana create a brake on Ghana's economic development.

What is the National Energy Transition framework of Ghana?

This Policy extensively incorporates the implementation of the National Energy Transition Framework of Ghana which guarantees the best fuel supply security through the provision of a cost-efficient diversified energy mix to accelerate socio-economic development and to achieve universal access to electricity by 2024.

What is the national energy policy of Ghana?

XVII Art. Cabinet at its forty-seventh meeting on 25th March, 2023 approved the reviewed National Energy Policy of Ghana which is intended to guide the development and management of Ghana's energy sector, especially during this era of the global call to transition to clean energy use.

Can Ghana decarbonise the energy sector?

By Edward Acquah Accra, May 27, GNA- As the world races to transition from fossil fuel to renewable energy, Ghana has developed a National Energy Transition Framework (2022-2070) to decarbonise the energy sector to help achieve net zero targets as part of commitments under the Paris Agreement.

What is Ghana's Energy Transition Plan?

Solar and biomass contributed one per cent each to the energy mix. Currently, about 70 per cent of Ghana's generation installed capacity of 5,321MW is from a thermal plant that uses natural gas as its primary fuel. Scope of framework Ghana's energy transition plan identifies energy and transportation sectors as key areas in reducing emissions.

Can a solar power plant be profitable in Ghana?

Other sites with much bigger potential can be profitable if only they are developed as hybrid schemes or for multi-purpose (water supply, irrigation, transportation) use. Ghana is well endowed with solar energy resources, which could be exploited for electricity generation and thermal applications such as water heating and crop drying.
