

What is Japan's 6th Strategic Energy Plan?

On October 22, 2021, the Government of Japan published the 6th Strategic Energy Plan to show the direction of Japan's energy policy. It explains our climate-related efforts to overcome challenges toward achieving carbon neutrality by 2050. It also covers policies to solve various issues in relation to the energy supply/demand structure of Japan.

What is Japan's Energy Strategy?

The strategy specifies 14 promising fields that are expected to grow, and provides them with action plans from the viewpoints of both industrial and energy policies. Japan upholds an ambitious goal while showing realistic pathways toward it wherever possible.

Is Japan's Energy Policy ambitious?

Japan's government called the package of energy policies and their targets "ambitious." Energy security considerations may affect the progress and pace of decarbonization in the electric power sector.

In 2023, LNG accounted for 29 percent of Japan's total energy generation, making the country the second-largest importer after China. However, Japan's consumption of LNG is on the decline.

Japan will strive for cooperative decarbonization across Asia by promoting joint demonstrations, international investment, and establishing standards for zero-emission technologies for biomass, hydrogen, ammonia, ...
