

# Google sunroof Hong Kong

Does Project Sunroof have solar data?

We currently have solar data for portions of 50 states and Washington DC. See if we've got you covered. Project Sunroof is a solar calculator from Google that helps you map your roof's solar savings potential. Learn more, get an estimate and connect with providers.

What is sunroof & how does it work?

Initially launched to drive consumer awareness and education, the service now also makes it easy for interested homeowners to connect with solar providers in their area. Sunroof covers 43 million rooftops in the U.S. -- which is more than 50% of all households -- and in the coming months will be available in all 50 states.

How much data does sunroof process?

Sunroof processes roughly 1 petabyte(1,000 terabytes) of data: height and color for 43 million homes; weather information; about 1,000 state and local incentives; and hundreds of local electricity rates. Over the past 3 years,Sunroof has grown from a part-time project to a full-time job for Elkin and his team.

In the beginning Hong Kong's charms were simple: a stunning natural harbour and a perfect location along the main trade routes into China. An important factor in Hong Kong's development was the large number of people coming from China, who formed the core workforce from its outset as a British colony to the industrialisation period.
