

Can Guinea Bissau use solar energy?

Table 1: Solar insulation in a horizontal plan in Guinea Bissau With a yearly average of over 5.8 Kwh/m²/day (table 1),GB should be able to take advantage of all solar energy applications.

What is the most popular solar application in Guinea Bissau?

As of today,the most popular solar application is the rural individual photovoltaic systemthat has been exploited in Guinea Bissau for the producing electricity to power houses,schools,offices and hospitals or health centers. Solar water pumping is the second most installed solar application in GB (Ex. PRS I and II in Table 2).

Are there wind turbines in Guinea Bissau?

Unfortunately,nonewere counted in Guinea Bissau. According to the current General Director of Energy in GB Eng. Fernando Ben#237;cio no electrical wind turbines have been installed in GB and there are no projects in this area for the near future. Some few windmills have been spotted in some remote areas in GB but they are no longer working.

What techniques are used to produce electricity in Guinea Bissau?

The main techniques used for the production of electricity are damsbut there are also other techniques such us: Run-of-the-river hydroelectric,pumped-storage hydroelectricity,Tidal power and wave power1. Guinea Bissau has an important site for the construction of a dam with a good potential for power generation.

What is SNV doing in Guinea Bissau?

SNV is starting a new area of focus in Guinea Bissau: Renewable Energies. The main objective of this paper is to provide SNV Guinea Bissau a portrait of the current status of Renewable Energies (RE) sector in Guinea Bissau,main actors and opportunities of intervention that can lead to a positioning of SNV in this sector.

Is Guinea Bissau a good place to build a dam?

Guinea Bissau has an important site for the construction of a dam with a good potential for power generation. The site is located in Saltinho and in 1983 a study done by "Consultores para Obras, Barragens e Planeamento, SA (COBA)" and financed by UNDP estimated that the dam could generate 18MW of electricity .
