

Hair dryer with constant temperature protection and power generation

What are the features of a thermoprotect hair dryer?

Protect your hair while enjoying fast drying results. This hair dryer has multiple speed and temperature settings. Features include ThermoProtect for fast drying at a constant caring temperature, Ionic Care and TurboBoost.

Why do you need a thermoprotect hair dryer?

The ThermoProtect temperature provides the optimal drying temperature and gives additional protection from overheating the hair. With the same powerful airflow, you will get the best results, whilst being kind to your hair. This 2200 W professional hair dryer creates a powerful airflow.

Why should you use a hair dryer?

Reduced noise while drying the hair Air flow resistance is reduced during transmission to effectively control the noise. With a softer sound and stronger air flow, you and your family can have a more pleasant hair drying experience. Multiple overheat protections for enhanced safety The NTC detects the temperature of the outgoing air in real time.

What is a 2200 W professional hair dryer?

This 2200 W professional hair dryer creates a powerful airflow. The resulting combination of power and speed makes drying and styling your hair quicker and easier. - Protect your hair while enjoying fast drying results. This hair dryer has multiple speed and temperature settings.

How fast does a hair dryer dry?

Dry quickly without damaging your hair and leave for work feeling refreshed Not all hair dryers can reach a drying rate of 6.1 g/min*. The strong air flow allows the moisture to evaporate quickly, reducing the time spent drying your hair, whether early in the morning or before going to bed.

How does a hair dryer work?

Hair naturally tends to carry a positive electrical charge, which makes it stand on end. Ions neutralize the charge, reducing static electricity to calm down your hair and make it smooth. Dust-resistant design for hassle-free hair drying. Keep hair and dust out with our hair dryer's front and back protection. Easy cleanup with a tissue.
