

Has Hanergy Photovoltaic Panel gone bankrupt

How has 2024 impacted the solar industry?

However, 2024 has brought immense challenges, with higher interest rates, tighter financing, and adverse policy shifts in key states contributing to over 100 solar bankruptcies based on our industry data, a number unseen before in our almost 20 years in the solar sector.

Why did solar contractors go out of business in 2023?

In 2023, the solar industry witnessed a significant number of contractors going out of business, a trend fueled by a confluence of economic and policy-driven factors. : The Federal Reserve raised interest rates to combat inflation, inadvertently affecting the solar sector.

What happens if a solar system goes out of business?

The supply chain for solar components might experience fluctuations due to altered demand patterns. Industry consolidation might occur, with larger players absorbing defunct companies' client base and assets. Homeowners may worry about the longevity and maintenance of their solar systems.

What happens if a solar company shuts down?

Customers amid warranty or service agreements may find themselves without support. The reduction in active contractors could lead to less competition, potentially impacting pricing and service quality in the short term. These closures could temporarily slow down the rate of new solar installations.

What happened to Norwegian solar ingots?

Norwegian Crystals, a producer of the ingot used in solar cells, had already filed for bankruptcy last month, it said. Norsun, another Norwegian solar company, this month said it would suspend production until the end of the year.

How does California's solar policy change affect contractors' business?

This policy change directly impacted contractors' business, as California is one of the largest solar markets in the U.S. The closure of numerous solar contractors in 2023 has sent ripples through various facets of the solar market, affecting customers, ongoing projects, and the industry.
