Heard and McDonald Islands redwood coast airport microgrid

Traditional microgrids -- typically a single building or contained campus -- are becoming more commonplace. But the gradual rise of multi-customer microgrid projects further blurs the line of where electricity customers end and the utility begins, challenging traditional roles and regulatory responsibilities.

If there's no power, the airport and the Coast Guard can't operate." Construction on the Redwood Coast Airport Microgrid--delayed a year by COVID-19 workforce and supply chain concerns--began more than a year ago and was completed in late 2021. The Most Focused Microgrid Conference? Microgrid 2022 in Philadelphia. Happening June 1-2.

"The Redwood Coast Energy Authority seeks to follow the airport project with a network of community microgrids and renewable backup power systems that can help manage disruptions within the rural energy supply," said RCEA"s Executive Director Matthew Marshall. The Redwood Coast Airport Microgrid will be fully operational later this year.

The Redwood Coast Airport Microgrid"s (RCAM) community partners announced Wednesday, July 7 construction activities on what will be the first 100% renewable, multi-customer microgrid in California. The Redwood Coast Airport Microgrid has been designed and developed by the Schatz Energy Research Center at Humboldt State University. Located at ...

The battery storage system, comprised of three Tesla Megapacks, coupled with the advanced controls system provides the ability to "island" from the main grid so the airport and adjacent Coast Guard facility can perform critical operations during regional power outages. Read more about this project on our Redwood Coast Airport Microgrid page.

The Redwood Coast Airport Microgrid (RCAM) is staging to be the leading Community Microgrid showcase in California - and potentially the country. RCAM will be the first front-of-meter ...

As the first front-of-the-meter, multi-customer microgrid in California, this project has created a test bed for the policies, tariff structures, and operating procedures necessary to integrate microgrids into California's electric grid, and provides a model for PG& E's Community Microgrid Enablement Program. The Redwood Coast Airport ...
