

# Hoisting photovoltaic panels on the roof

Can solar panels be mounted on a roof?

Naked have seen it all before and can help you find the perfect Solar mounting system to get your solar panels where you want them. We've all seen Solar PV panels mounted on people's roofs and on the roofs of businesses, so here's a rundown of the options to get them up there. By far the most common method for fixing Solar PV panels to a roof.

How do you lift solar panels on a roof?

To lift solar panels onto your roof, you can use a ladder railing system, a pulley system, a lifting bag, or even DIY lifting systems using a pulley. Carrying them up the ladder can also be done with products like the solar panel caddy, and all of these ideas will make this task that much easier.

Can solar panels be lifted on a roof?

Lifting solar panels onto a roof requires specialized equipment based on the weight, dimensions, and height of the installation.

What is a whole roof solar system?

Whole roof solar systems mean that your Solar PV panels become the fabric of your roof, serving two purposes, weather proofing and energy supply. The Solar PV panel frames are bespoke for the mounting system so there is a limited choice of panels with these set ups. Luckily there are still good quality panels to choose from.

How do you carry solar panels on a roof?

The panel is placed inside the bag and then lifted onto the roof. You can use this with a motor or winch if you don't feel like doing all that work yourself. This is another way to carry solar panels using the solar panel caddy, which uses a gravity-fed clamp device with a rubber handle that disperses the panel's weight evenly.

What types of roofs can I install solar PV on?

Our solar PV installers, roofers and electricians have carried out installations on most types of roofs, including commercial roofs and flat roofs.
