What does kathea energy do?

This capability was extended to energy solutions and services in 2016, growing from a division to its own focused business called Kathea Energy. Kathea Energy focusses on commercial energy solutions.

Who does kathea energy sell to?

Kathea Energy distributes products and services to EPC's, resellers and installers and does not sell directly to end users. Founded in 1996, Kathea has a rich history of pioneering markets for selected manufacturers through focused and boutique distribution in South Africa and across the African continent.

What type of energy is used in Honduras?

Solar photovoltaic (PV) energy followed at 18.9%, with wind power at 12.9%, and geothermal energy at 5.8%. Due to the diversity of the Honduran landscape, the potential for wind development varies considerably. A 100 MW wind project was built in 2012.

Does Honduras need a 'energy Emergencia'?

Access to electricity in rural areas needs to be improved. In June 2007, the president of Honduras, Manuel Zelaya, declared an "energia emergencia". An Intervention Board (Junta Interventoria), headed by the Minister of Defence and the Minister of Finance, was temporarily put in charge of ENEE to address the crisis.

Does Honduras have solar power?

Honduras has a large potential for solar photovoltaic generation. In fact, it is a practical solution for servicing energy-isolated rural communities. In 2007, there were about 5,000 individual Solar Home Systems, with an average size between 30 Wp and 50 Wp, which makes up for a total capacity of approximately 15 to 25 kW of power.

Does the Inter-American Development Bank support energy projects in Honduras?

Currently, the Inter-American Development Bank is contributing funds and assistance to the following projects in the energy sector in Honduras: An Energy Sector Support Loan supported through a US\$29 million credit approved in September 2008. This project will finance priority investments in transmission and support a program for reducing losses.

This Renewables Readiness Assessment (RRA), developed in co-operation with the Honduran Energy Secretariat (SEN), identifies key barriers and solutions to meet Honduras' targets for renewable energy development and expansion.
