

How many photovoltaic panels are suitable for roof installation

How many solar panels can be installed on a roof?

Your roof will need to be large enough to fit a suitable number of solar panels, as there's rarely much point putting just two or three panels up there. The average solar panel takes up 2m², and your installer should leave around 40cm on each side of the array, as well as 3cm between every panel.

Can you install solar panels on a roof in the UK?

The majority of UK homes have a roof suitable for solar panel installation. Great news for anyone looking to generate their own renewable electricity. If you'd like to speak to an MCS certified (or equivalent) solar installer for advice - you can get free no-obligation quotes from up to 4 solar installers in your area using Solar Guide.

Is my roof big enough for solar panels?

Whether your roof is big enough for solar panels depends on the size of the array you want installed. You can also look at our other resources to see how many solar panels you may need for your particular house size and roof. For a standard 4kW size system you would need around 28 square meters of clean roof space.

How many solar panels does the average UK House need?

The average 3.5kWp (kilowatts peak) solar PV system in the UK comprises 10 standard 350W panels, each of which measures 1m x 2m (2m²), with this average installation taking up 20m² of roof space (about 4m x 5m).

What size solar panels do I Need?

Solar panels usually have an area of 1.3-1.7m², with 1.6m² being the most common size. To calculate the required roof space: Multiply the number of solar panels by the average panel size in square meters. Compare the resulting area against your available roof space. For example, using the solar panels calculation from the previous section:

Can solar panels be installed on a glass roof?

Glass roofs: As they are too fragile to support the solar panels and fixings. Nevertheless, if your roof isn't suitable for solar panels there are other options too. For example, you may be able to install ground-mounted solar panels to take advantage of any shade-free land you own.
