

How often should photovoltaic panels be repaired

How often do solar panels need maintenance?

Periodically, your solar panels may need more in-depth care. The frequency at which you need to perform the maintenance of solar panels will largely be determined by your location and the local weather conditions you experience. Heavy snowfall and decreases in energy output are the two primary causes for extensive maintenance.

How often should I schedule a solar maintenance check?

As a solar energy expert with twenty years of experience, I advise clients to schedule a professional maintenance check either once or twice a year. To check the efficiency of your solar panels, use a solar monitoring system. It tracks how much energy your panels are generating and will alert you if production levels drop significantly.

Are solar panel repairs a part of our maintenance services?

Certainly, solar panel repairs are a part of our maintenance services. Our MCS & NICEIC accredited repair team can tackle a range of issues, ensuring your solar panels return to optimal performance swiftly. Typical issues requiring solar panel repairs include micro-cracks, hot spots, and PID.

How often should a solar panel service visit be performed?

We recommend an annual (or biannual for high-risk systems) preventative and safety assurance solar panel servicing visit to assess that your system is safe, working at its best performance, and delivering your environmental and financial goals. As technical experts, we are here for your renewable technology operations and maintenance needs.

How often should I check my solar panels?

We recommend that you get a professional to check over the system at least once every 5-10 years. This way, you can keep on top of any nasty financial surprises, whilst making sure that your panels are generating enough power to save money on your bills.

How much does it cost to repair a solar panel?

If something does go wrong and your solar panels need fixing, repair costs will vary, depending on what the issue is. Small damages can cost around £80 to fix, whilst fully replacing a solar panel can cost over £1,000. There are also a few things, such as solar inverters, that may need replacing along the way.
