

# How to install the photovoltaic adhesive clamp

Where should clamps be connected to the PV module?

When the mechanical load pressure is  $\leq 2400\text{Pa}$ , Clamps should be connected to the module between 400 and 500mm from the edge of the module. This distance is from the module edge to the middle of the clamp.

\*NOTE: We need two or three support rails below the PV module to make sure the module have a good mechanical load performance.

How do I install a double glass PV module?

Insert the PV module into the clamp, and make sure the module edge touch to the EPDM closely and then tighten the nut with uniform torque values using a qualified torque wrench to ensure the double glass module is firmly secured. Trina suggests using M8 bolts to affix the double glass modules onto the clamp.

How to install Trina Solar module with frameless clamps?

Please consult with a Trina Solar engineer before installing with the frameless clamps. Clamps should be connected to the module between 300 and 400 mm from the edge of the module. This distance is from the module edge to the middle of the clamp. \*Note: Need two support rails below the PV module to make sure the Mechanical load.

How do I install a solar photovoltaic system?

Installing solar photovoltaic systems requires specialized skills and knowledge. Installation should only be performed by qualified personnel. Before installing a solar photovoltaic system, installers should familiarize themselves with its mechanical and electrical requirements.

How do I install a solar stack module?

Insert the end clamps laterally in the pedestal. The end clamps are attached and then tightened at the height of the module frame. Modules should be installed to the Solar Stack pedestals with the manufacturer approved middle/end clamps. There are different types of clamps available for the module installation.

How to install a PV module?

Remove the bottom connector parts. Connector parts : M8 Nut ?spring washer and washer. Put the clamp bolts into the installation holes, and then tighten the nuts. Insert the PV module into the clamp, and then tighten the nut. M8 ss304(16N $\times$ 3; m~20N $\times$ 3; m) Insert clamp into the connector racking.
