

# How to use photovoltaic panel cleaner

How to clean solar panels effectively?

Now that you have everything you need, let's dive into the step-by-step guide for cleaning solar panels effectively. Timing is crucial when cleaning solar panels to ensure optimal results and safety. It's best to clean them early in the morning or late afternoon when the sun's rays are less intense, and the panels are cooler to the touch.

Do you need a professional solar panel cleaner?

Hiring a professional solar panel cleaner is the best way to give rooftop panels a really thorough cleanse, but you can do a basic clean from the ground with not much more than a garden hose. Here we'll explain how to clean your solar panels safely and effectively. **READ NEXT:** The best solar panels to buy

Do solar PV panels need to be cleaned?

That said, most solar pv panels in the UK will not need any heavy-duty cleaning because regular rain will wash most dirt and grime off the surface, dispelling one of the myths about solar being its difficulty to clean.

Can you use vinegar to clean solar panels?

Vinegar is a great cleaning agent for solar panels because it contains acetic acid, which is very capable of breaking down tough stains, dirt and grease. It is also readily available and any vinegar will do although the best type to use is white cleaning vinegar.

Can a cleaning brush be used on solar panels?

It can be used on both solar thermal panels as well as solar PV and is a non-caustic formula. This cleaning brush is specially designed to clean solar panels with a 7.5 metre telescopic rod and rotating circular brushes with a direct water feed.

How do you clean solar panels from the ground?

Here's a step-by-step guide to cleaning your solar panels from the ground: 1. Switch off the entire solar PV system. Your solar PV system manual will tell you how to do this. 2. Gently remove any loose dirt and leaves using a leaf blower or a soft brush with a long (very long, preferably extendable) handle. 3. Mix warm water and washing up liquid.
