Total installed solar panel capacity reached 573.8 MW at the end of 2023, energy ministry data show, with rooftop solar panels estimated to contribute around 90 MW of the figure. The ministry aims for the installed capacity of solar panels to reach around 770 MW this year and 3.6 gigawatts by the end of 2025.

24-7 reliable electricity supply is a must for any business. If you are off the grid entirely, or if the grid power supply proves to be not reliable enough, a solar-fed battery storage system is a simple and cost-effective alternative to a dirty and cumbersome diesel-fired genset.

The Indonesian Ministry of Energy and Mineral Resources (ESDM) has established ambitious renewable energy targets, aiming to significantly expand the country's solar power capacity. 5 By 2024, the ministry seeks to reach 770 MW of installed capacity, followed by a substantial increase to 3.6 GW by the end of 2025.

3 ???· For its part, EliTe Solar will benefit from Indonesia's growing solar industry. The country's solar potential is estimated at more than 3 GW, and EliTe Solar hopes its new center ...
