

Are solivus Arc Solar panels recyclable?

The lightweight solar panels used in the Arc are organic, containing no rare earth materials, meaning there is an incredibly low carbon footprint involved in manufacturing. The Arc is recyclable and can be taken with you if you move home. The Solivus Arc serves as a beacon of Solivus' innovation and expertise in lightweight solar.

Does solivus install solar on commercial roofs?

Solivus installs lightweight solar on commercial roofs that can't take the weight of conventional solar. Solivus has the Solivus Arc for domestic customers who want an aesthetic super clean ground mounted solution for their home. What's in store for the future?

What is solivus arc?

Solivus is creating a revolutionary solar energy solution for homeowners. The Solivus Arc. Solivus®; can provide storage solutions to meet current and future energy needs through our choice of carefully selected partners- from storing cheap off-peak energy through to customers enjoying grid-balancing income from batteries.

Will solivus cover industrial buildings with solar fabric?

The company behind it, Solivus, plans to cover the roofs of large industrial buildings with the solar fabric. These include supermarket warehouses and delivery company distribution centres. But Solivus also plans to manufacture solar units or "arcs" for home use.

What is solivus doing at Cotswold Airport?

This year, Solivus is ramping up installations including an installation at Cotswold Airport on aircraft hangars. The solar panels from this installation will generate on-site energy to power an electrolyser used to create hydrogen from water. The hydrogen will in turn be used as super green fuel to power new electric planes.

How much electricity does solivus provide a year?

Solivus has just finished fitting 606 of them to the roofs of the north and west stands at Northampton Saints' rugby stadium. They will provide about 53,000 kWh per year, at 15.5p per kWh, less than half of most fixed-rate tariffs, it says.

Solivus, a provider of lightweight solar installations for commercial applications, has designed and delivered a 2m solar installation to Farnborough Airport, taking it one step closer to its commitment to reach net zero emissions by 2030.
