

Why is energy demand rising in Ireland?

Ireland's overall increase in energy demand was led mainly by the transport sector, which was up 4.5 per cent due to private car use and aviation, it said. In the residential sector, demand for gas, coal, peat and oil all dropped last year, with home energy demand reaching its lowest level in 25 years.

What will Ireland's energy supply look like in 2022?

Petrol demand may be 7.4% higher than in 2022 and reach 96.5% of the pre-COVID demand observed in 2019. Transport emissions may be 11.8 MtCO₂e, up slightly on 2022 emissions. In the first 9 months of 2023, Ireland imported 9.1% of its electricity supply, up from 1.1% in 2022.

How has Ireland improved energy security?

Ireland boasted the third highest share of wind in electricity generation of IEA member countries in 2017. It has also improved its energy security through an increase in domestic gas production and a reduction of oil's share in energy supply.

What percentage of Ireland's Electricity comes from renewables?

38.9% of electricity generated in Ireland came from renewables. Practically all new electricity demand in the last decade has come from the commercial services sector. Electricity demand in the commercial services sector has increased by 61.5% since 2012, while the electricity demand in all other sectors has increased by just 8.0%.

What percentage of Ireland's Electricity comes from fossil fuels?

93.9% of road transport energy demand came from fossil fuels. Demand for electricity was 2.5% higher than in 2021, consistent with the annual growth of recent years. The carbon intensity of Ireland's electricity was 332 gCO₂/kWh. 49.2% of the electricity indigenously generated in Ireland came from gas.

What is the role of energy transformation in Ireland?

How is energy used in Ireland? Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

Aera Energy LLC (Aera) is an oil and natural gas exploration and production company jointly owned by Shell and ExxonMobil, headquartered in Bakersfield, California and operated as a stand-alone company through its own board of directors.
